

# THE MADGETTS BLOCK

SUSTAINABLE WINEGROWING AUSTRALIA. CERTIFIED.

An aerial photograph of a large, green agricultural field. The field features several sets of concentric circular crop patterns, likely from a center pivot irrigation system. A white SUV is parked on the left side of the field, facing towards the center. A small, dark trailer or piece of equipment is hitched to the back of the SUV. A few people are standing near the vehicle, appearing very small due to the scale of the field.

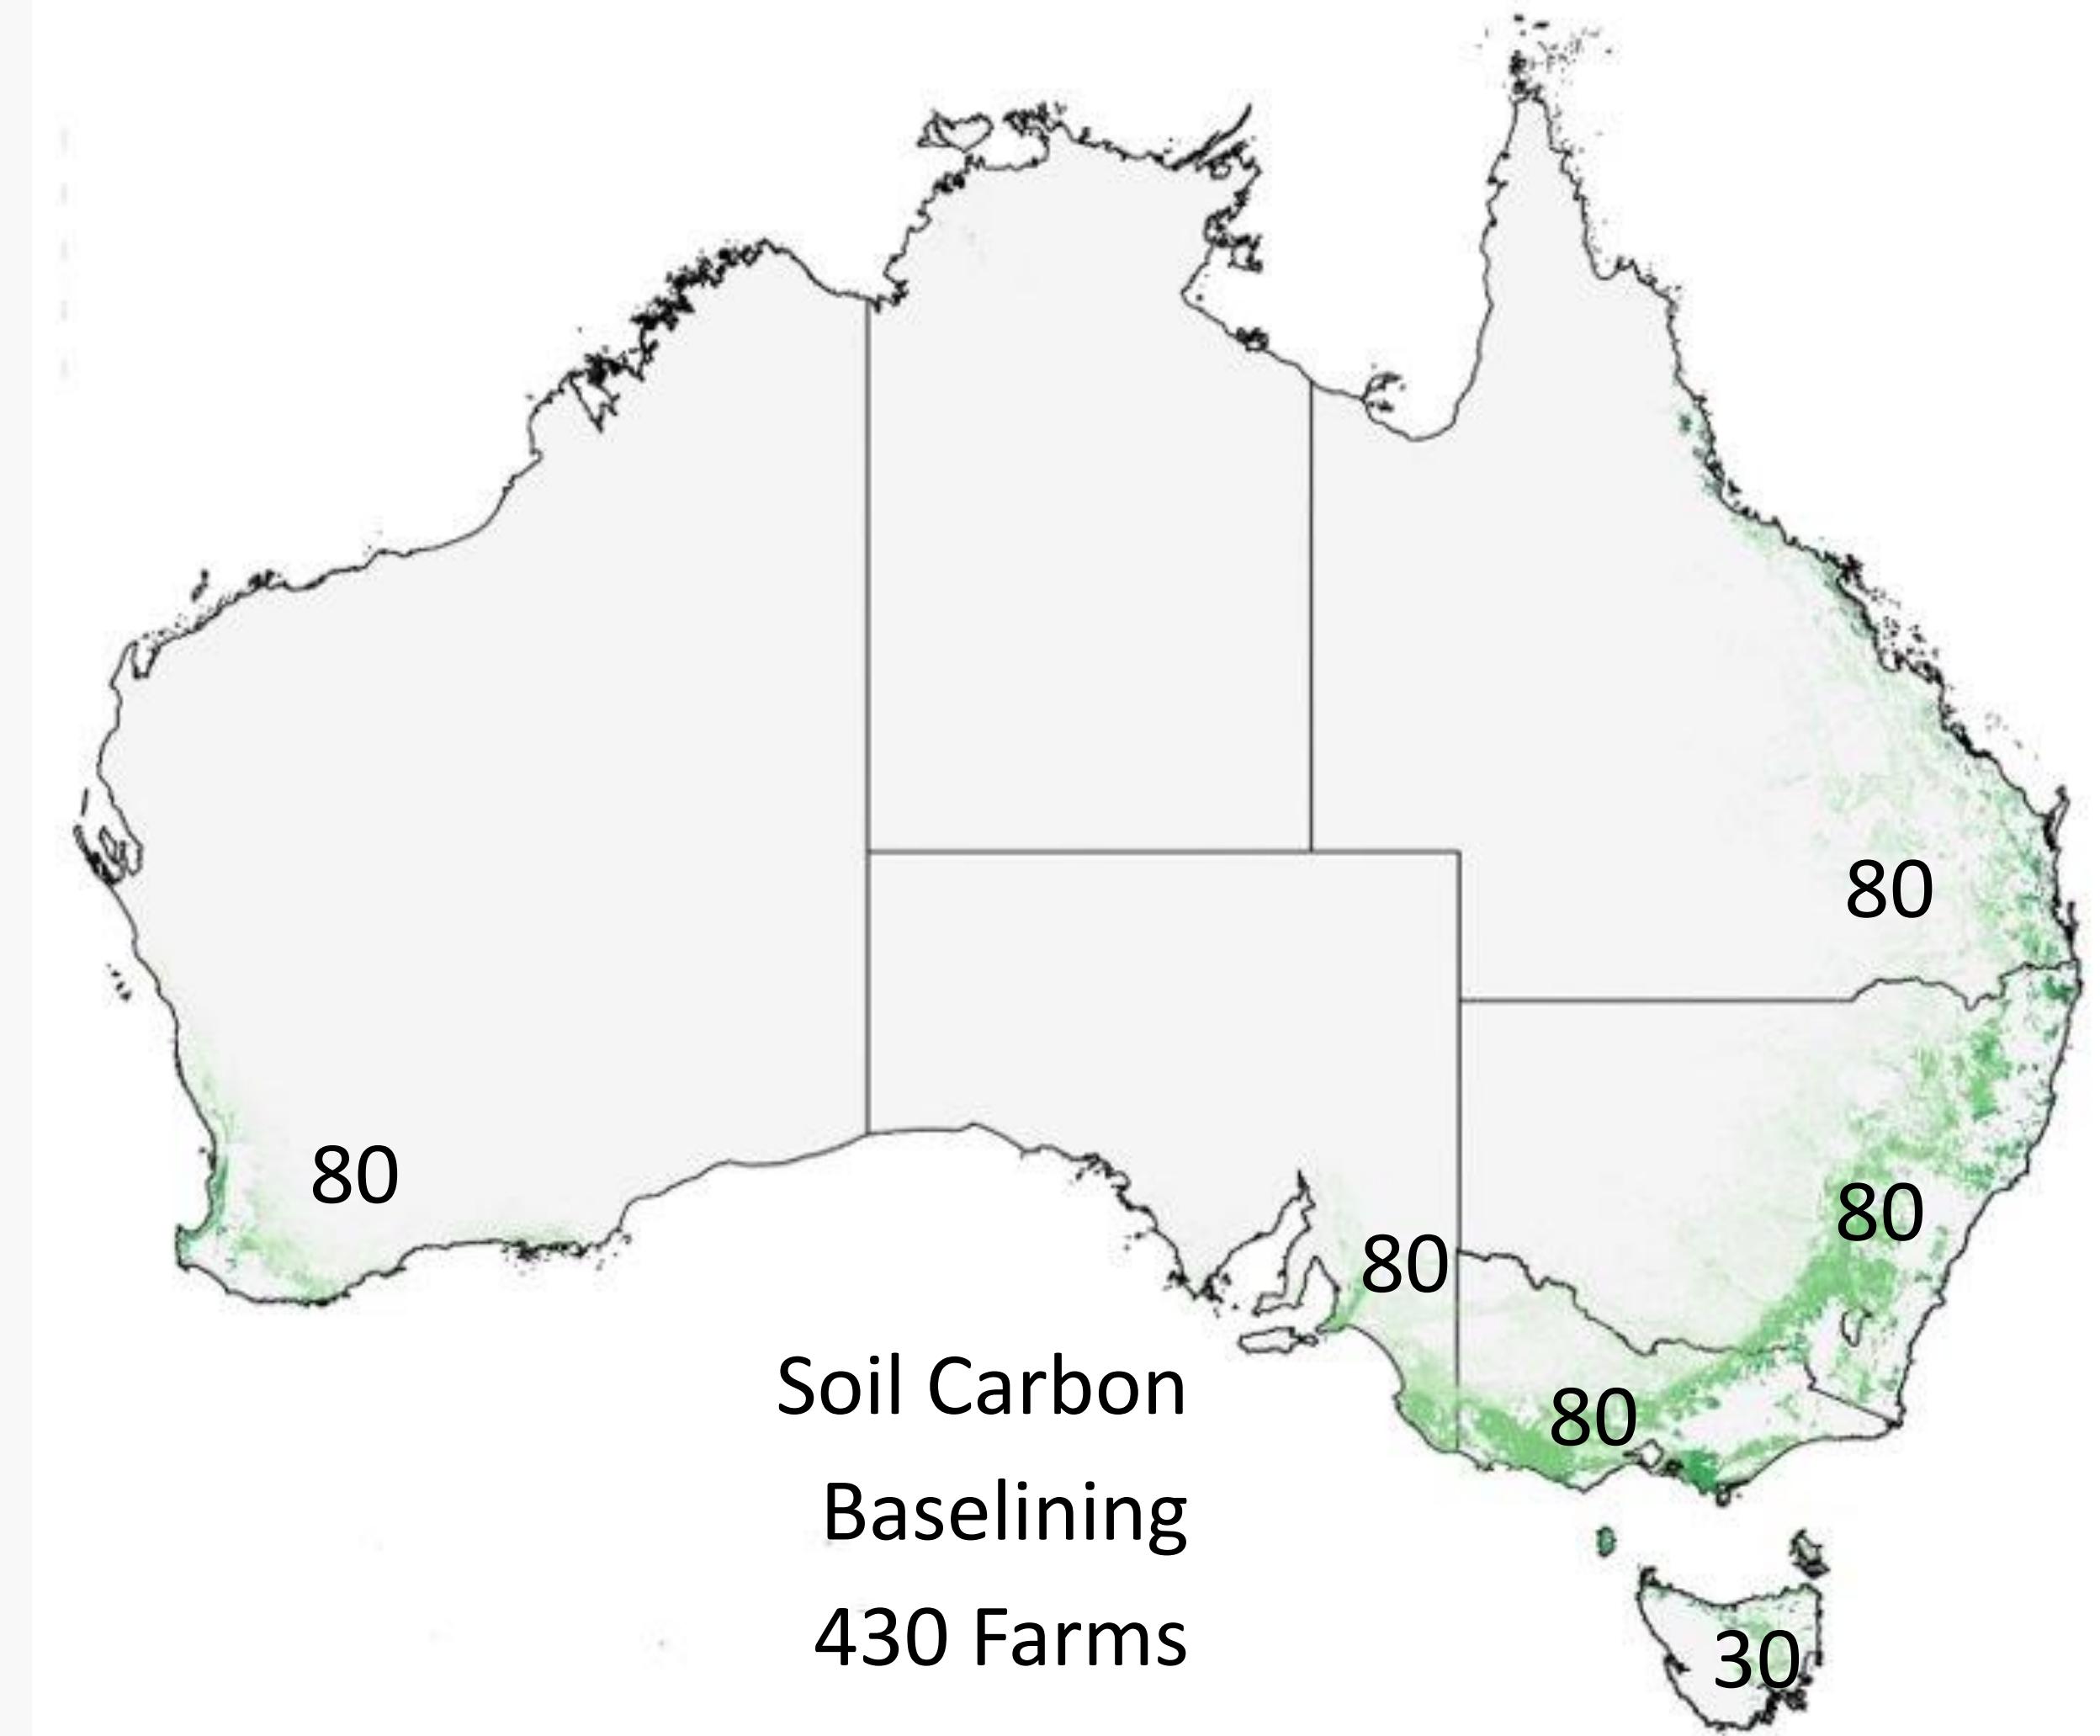

# National Soil Carbon Innovation Challenge

Localising a model using a low #  
of physical soil samples

- 10 Making a prediction of soil carbon every 10m<sup>2</sup>

A photograph of two women standing in a grassy field, looking at a tablet computer. They are wearing dark long-sleeved shirts and jeans. In the background, there is a wire fence, a large tree on the left, and a white building with a solar panel array on its roof. The sky is clear and blue.
